

IDEAS

Theme: TB awareness and current impact
Fatality Rate

Incidence Graph

Over time TB has been the most fatal curable disease

Risk Factors:

TB is dangerous as it is compounded by other diseases, and contagious.
↳ Immunodeficiencies

[Regional Trends]

People living with TB

TB deaths

SDG?
↳ SDG 3

End the epidemic of AIDS, TB, and other communicable diseases

Filter

↳ I don't think global trend is less useful than regional

↳ Our dataset is global, make a global trend time series

① Categorise TB incidence
Global trend, would expand to regional

② TB deaths
Same comment

③ TB fatality

④ People living w/ TB

⑤ Risk factors

Questions

① Will need to identify based on the data which is more feasible: Regional or global?
↳ Or top 10 countries

② Same above

③ Add a slider to map?

Refine

③ Add slider to map?

④ Add a year slider.

↳ Consider:
↳ Tooltips

↳ Text / line annotation

↳ Filtering:

↳ Selection via legend
↳ Filtering on selection / remove
↳ Slider filter

LAYOUT

- ① Explain what:
- ↳ UN, SDG is
 - ↳ what TB is

② Occurrence

- ↳ What Where is it prevalent?
 ↳ Flick thru different variables?

③ Time series

TB Deaths

TB Incidence

FOCUS

- ① What is TB?
- ↳ A respiratory, contagious disease
 - ↳ Primarily affects IMMUNO-COMPROMISED.
 - ↳ Which is why it is dangerous.

- ② Occurrence
- ↳ Fatality map, funding, deaths, etc

③ Time series

Consider an interactive filter
 to remove lines, or
 to split by selection

OPERATIONS

- ↳ Just Intro text
 ↳ SDG ↳ UN
 ↳ TB ↳ Benchmark

- ↳ Consider making a carousel
 to flick thru different
 choropleth maps
 ↳ Tooltip, Slider etc

- ↳ time series
 ↳ Consider facet by region
 to better split patches

DISCUSSION

- ↳ Choropleth map needs a
 good colour legend
 ↳ Time series needs to highlight +
 annotate benchmark goals. SDG
 aims to eradicate the disease
 by 2050.
 ↳ Not pictured as I ran out
 of space: risk chart. Use
 box plot.

Speed 3
Name: Amelia Ng
Date: 11/10/2023
Task: #3

2mm Squares

LAYOUT

- ① Explain what:
↳ UN, SDG is
↳ What TB is

④ Risk chart

③ Occurrence

- ↳ What Where is it prevalent?
↳ Flick thru different variables?

OPERATIONS

Time series uses an adjusted dataset to get continent data.

- ↳ Use Our world in Data on

'May need to change/retrieve population stats

③ Time series

TB Deaths

TB Incidence

Regions, could show countries

Narratively:

- ↳ Introduce SDG, UN's goals and why TB is a problem

- ↳ Show world distributions or maps

- ↳ Show time trends via lines. Can show regional changes.

- ↳ Show risks

- ↳ Supplement with text annotations

FOCUS

① What is TB?

- ↳ A respiratory, contagious disease
↳ Primarily affects IMMUNO-COMPROMISED.
↳ Which is why it is dangerous.

④ Risk chart

- ↳ Colour each of the categories
↳ Needs tooltip and distribution
↳ Not sure how to do that in Vega Lite

③ Map slider/carousel:

- ↳ Might struggle to add in JS

DISCUSSION

- ↳ Data is ~~REALTY~~ REALLY hard to read...

- ↳ May have to simplify graphics

- ↳ Consider correlation graphs if data permits.

Sheet 4
Name: Audia Ng
Date: 11/10/2023
Task: #4

2mm Squares

LAYOUT

- ① Explain what:
↳ UN SDG is
↳ What TB is

④ Risk chart

Can Veger like
calculate quantities?
Might have to check

③ Occurrence

- ↳ What Where is
it prevalent?
↳ Flick thru different
variables?

↳ 3x maps, separated by slider or
carousel toggle

③ Time series

TB Deaths

TB Incidence

↳ Click on lines to highlight, toggle
opacity of other areas.

↳ Click on button to show regional
facets? Only if we can satisfy
MVP first.

FOCUS

What is TB?

- ↳ A respiratory, contagious disease
↳ Primarily affects IMMUNO-COMPROMISED.
↳ Which is why it is dangerous.

]- 2nd most deadly disease, after
COVID-19 in 2014-2021.

③ Maps

- ↳ Fatality Rate - choropleth
↳ New cases - Proportional symbol
↳ Deaths - Proportional symbol

③ Time series

- ↳ How to put a static flat line?

DISCUSSION

- ↳ Reduce # of maps if too
hard
↳ Use bar chart instead of
box plot for #4 Risk
↳ We need text boxes for each
section, plot out how that
would look.

LAYOUT

① What is...
SDG 3

What is TB

②

Fatality

Deaths

000

Tuberculosis... Info, History

Deaths

Incidence

Risks, symptoms

Conclusion

Common correlations to TB
↳ Explain why:
immunocompromised
and are far more
likely to get it.

OPERATIONS

Starting text on topic cover:

- ↳ SDG meaning
- ↳ VN
- ↳ TB
- ↳ Goals for SDG 3, milestones

Sketches of maps.

- ↳ Tooltips, interactive
- ↳ On deaths / new case symbol means, make a size filter

Historical info of TB, why is it an issue?

DISCUSSION

- ↳ Milestones may differ from dataset to dataset
- ↳ Consider a dropdown box or interactive element
- ↳ Can HTML / CSS make a carousel? Or can I make a button
- ↳ If the data doesn't allow for box plot, do a bar chart instead
- ↳ Consider a button for swapping to facets and back.
